

Sustainably Produced Food for All Bradford on Avon area

Self-Assessment of Provenance and Packaging

Invitation to all Hospitality and Food and Drink Retail Businesses

- How aware are you of sustainability practices in food and drink production?
- How much do you consider sustainability issues when procuring food for sale/catering?

Climate Friendly Bradford on Avon and the Fairtrade Group have devised a **self-assessment questionnaire for businesses**, which has the support of Bradford on Avon Town Council. We encourage you to have an increasing **focus on environmental sustainability** issues with respect to the **provenance and packaging of the food and drink you serve or sell**. Click on the links below to view:

- the [Invitation](#) – which you may also receive as a leaflet delivered by a member of one of the participating organisations
- the Provenance and Packaging [SELF-ASSESSMENT questionnaire](#) for Businesses to encourage you think about sustainability issues and consider drawing up an action plan. [DOWNLOAD the MS Word version](#) then fill in the form off-line. **It will be confidential to your business.**
- the [Sources and Resources](#) document gives extensive supporting information and links. This is intended as a 'skim and pick' resource – glance through and then look in more detail if your eye settles on items of interest/relevance to your business.
- the [Feedback Form](#) – tell us what you are already doing well or positive plans - we will be really interested and share with others (if you would like us to).
- the [Plastic Free leaflet](#) to print off and display

We know these are very challenging times for businesses with spiralling costs and a cost-of-living crisis. However, it is also vital that we all take action to tackle the Environmental and Ecological Emergencies: Bradford on Avon is committed, through the Town Council Declarations, to addressing these crises. Even small changes as business risk allows, can make a difference. Increased sustainability can increase customer support; and, some changes can reduce business costs. We hope that you find this a useful resource.
