

FOR IMMEDIATE RELEASE

***Free Breast and Cervical Cancer Health Education Classes from Your Own Home!***

Chico, CA-The California Health Collaborative's Every Woman Counts program is offering FREE virtual health education classes on breast and cervical cancer early detection, screening and prevention. Every Woman Counts is California's free breast and cervical cancer screening program for uninsured and underinsured California residents. Certain priority populations and geographical areas of California are at higher risk, and there are steps you can take to reduce risk factors for breast and cervical cancer.

*When and Who* should be screened for breast and cervical cancer can be complicated. Sign up for a free and confidential one-hour *live* educational program with Health Education experts who can answer your questions, link you to no cost screening services, and/or a Registered Nurse who can help you navigate the breast and cervical cancer continuum of care. All you need to participate in this workshop is an Internet-connected device and access to ZOOM. But, if you or someone you know doesn't have access to the Internet, we are happy to schedule a 1-on-1 phone call to answer your questions.

Select your class and register or request a one-on-one phone call by calling toll-free:
