

COP26 Campaign aims

Bringing countries together to tackle shared climate challenges and accelerate progress towards a zero emission, resilient global economy

Adaptation and resilience

Encourage greater political ambition, tools, finance, coordination and commitments to support practical adaptation and resilience action

Energy transition

Seize the opportunity of rapidly falling renewables and storage costs to accelerate zero-carbon transition

Clean transport

Accelerate the transition to zero carbon road transport by phasing out petrol and diesel engines

Nature

Protect and restore our natural habitats and ecosystems on which our climate, air, water and way of life depend

Finance

A green transformation of the financial system so that all countries have access to funds for climate investment

Action on finance underpins all other COP campaigns

COP
campaign
aim

Health
aim

Build climate resilient health systems, and support adaptation in food systems, water and sanitation, transport and energy systems

Guide a rapid transition to clean renewable energy, to save lives from air pollution, particularly from coal combustion. Ensure energy security for health facilities and decrease energy poverty.

Promote sustainable, healthy urban transport systems, including active and public transport, and the rapid phase out of petrol and diesel engines

Protect and restore nature and ecosystems, the foundations for healthy lives and sustainable livelihoods

Invest in climate-resilient health systems. Value health gains from carbon mitigation and adaptation policies, fossil fuel-subsidy reform and carbon pricing
