

# Helping you understand and navigate the Review of Electricity Market Arrangements (REMA)

CORNWALL INSIGHT  
CREATING CLARITY

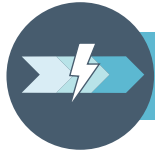

## Our expertise

Analysis of the whole value chain through consulting and insight reports

A near 20-year track record of expertise in market design and governance

Board level strategic and risk management advice

## How we can help

**Strategic evaluation:** We provide an understanding of what REMA could mean for your business' portfolio and focus your thinking as REMA develops.

Our experts will cover what's changing and what your options are with a focus on the implications specific to you. We will provide a wider sector analysis by industry sector, along with a timeline and likelihood for any changes.

## Supporting you as REMA develops

We are here to support you as REMA develops in several ways:

- **Sector risk register** - Based on your business' portfolio and updated on a regular basis, with workshops included.
- **Strategy and positioning** - Support with ongoing positioning and strategic responses to REMA.
- **Regular updates** - Via our comprehensive subscription portfolio, including our weekly Energy Spectrum publication, Daily Bulletin and policy/regulatory alerts.

## Training Course: Future of Electricity Markets

This session introduces a range of scenarios for the evolution of the GB electricity market to 2050, some of the technologies that may be required at scale to meet net zero, and considers future market design.
