Using Library Search to find a book

1. Type in the keywords (title or author) and click on the search icon 🔍

2. Click on the 'Available at...'

3. Click on 'GET IT' or scroll down to the Locations section

4. If 'Available' within the library note the library location e.g. Franklin-Wilkins and the classmark (classmark = shelf location code e.g. RC660 KRE)

5. Click on Locate, to view the floor plans (or use the physical ones in the libraries) to find where the corresponding classmark is within the library (note the letters on the floor plans indicate the first letters of the classmark)

Are you new to Kings or want to find out about more advanced features for Library Search?

See the 'Getting Started with the Library' section in your subject Library Guide **libguides.kcl.ac.uk/home**
