

Questions we MAY ask your GP

These are some examples of the types of question that we MAY ask your GP/health consultant if we approach them for a medical report.

Patient Records

- From what date do the patient's records in your possession begin?
- If this period is not continuous, please give reasons (if you know them) for any gaps.

General Information

- a. Last three height and weight measurements including waist size
- b. Last three blood pressure readings
- c. Last three cholesterol readings
- d. Smoking habits
- e. Drug use
- f. Alcohol use

Specific Medical History

Additional details will be requested for any specific condition given during the application process.

Current Health

- Is your patient having or waiting for any referrals, investigations or follow-up?
- Details of any medication or treatment currently being received.
- Details of any tests that have recently taken place or are awaited.

Recent Health

Please give details of ALL health record entries in the last 24 months.

Health History

- a. Has your patient had a history of or symptoms of any of the following?
 - Any type of cancer or malignancy
 - A growth, lump or tumour
 - A mole that has needed specialist referral
 - Anxiety or depression
 - Eating disorders
 - Overdose
 - Suicide attempt/self-harm
 - Any other mental health issue

(continued on following page)

Health History (continued)

b. Has your patient had a history of or evidence of a condition affecting any of the following?

- The brain
- The heart
- The kidneys or bladder
- The liver
- The lungs
- The skin, eyes or ears
- The oesophagus, stomach or bowel
- The immune system
- The blood vessels or lymphatic system
- The endocrine system (e.g. diabetes)
- The musculo-skeletal system
- The nervous system

c. Has your patient had any test results which were either out of range, abnormal or required follow-up in the last 5 years?

Additional information would be requested for any positive answer given.

This would include details about any consultation with a health professional in relation to this condition.

Examples of what information this may include are as follows:

- the exact nature of the symptoms
- treatment
- referrals
- investigations and their results
- hospital admissions and time off work.
